## Data Sharing

### Enhanced Data Sharing Module (EDSM)

Hazelmere Medical Centre use a clinical computer system called SystmOne to record your medical information. With your consent, you can allow your full GP record to be shared with other healthcare services that are providing care for you and who also use SystmOne. These other services will always ask consent to view your record.

Tick this box if you wish to opt-out of the enhanced data sharing module

### Medical Interoperability Gateway (MIG)

The MIG enables secure sharing of relevant medical information from your GP record with other healthcare professionals who are providing you with direct care, even if they are not using the same electronic records system. At point of care you will be asked if you consent to the care service seeing essential elements of your record.

More information can be found by visiting: <http://www.healthcaregateway.co.uk/products>

Tick this box if you wish to opt-out of the MIG data sharing

### Risk Stratification Preferences

**Risk stratification** is the process of identifying the relative **risk** of patients in a population by analysing their medical history. It's a key enabler for improving the quality of care delivered by the NHS. Hazelmere Medical Centre is taking part in the Risk Stratification programme and will be uploading patient identifiable data for analysis. Patient identifiable information will only be viewable at GP practice level. Any NHS organisation external to the practice using risk stratification will only see anonymised data.

Tick this box if you wish to opt-out of the Risk Stratification programme
